

ENTERPRISE LEGAL MANAGEMENT

Paragon's Enterprise Legal Management Services

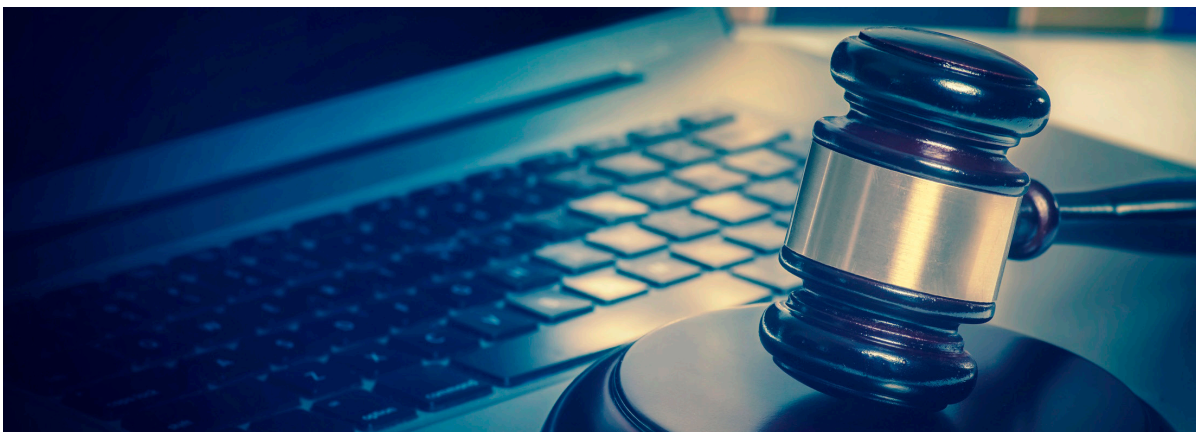

Legal departments in nearly every industry are experiencing unprecedented levels of activity. Much activity is derived from increases in the following areas: M&A Patent Protection, Regulatory Compliance and Contract Performance Management. Paragon's solutions enable legal departments to tackle increased activity by enhancing collaboration and sharing, providing better access to information, and implementing best practices for the protection and management of records and information.

A Wealth of Expertise in Legal to Help Organizations:

- **Create visibility** into all legal-related activities including Legal Matter, Spend, Contracts and Intellectual Property via integrated technology platform and supporting systems and processes, as well as integration with other enterprise solutions including ERP to ensure alignment with purchasing and invoicing data and processes
- **Eliminate contract lapses** and improve negotiating position and partner prioritization by contract performance reporting and analytics, and alerting for upcoming contract expirations
- **Ensure aggregation and management** of all matter-related information and correspondence via integrated systems and processes that provide the ability to publish to, or associate information with each matter, and to easily locate information against an appropriate security model
- **Monitor matter status** and drive collaboration via reporting and analytics, and subscription capabilities
- **Enable collaboration** capabilities ensuring internal counsel can work with external partners or entities in a controlled and secure environment
- **Implement solutions** with a centralized data and information repository, collaboration capabilities, prosecution workflow management, docketing management and PTO integration
- **Increase preparedness** by enabling the automatic discovery of information across the organization and its assessment against predefined business rules to identify relevance and other characteristics for audit or legal action

Paragon offers solutions in the following corporate Legal functions:

- Enterprise Legal Management
- Case and Matter Management
- Spend Management
- Contract Management
- Records Management
- eDiscovery
- Intellectual Property Management (Patent and Trademark Management)

Paragon Approach

We design processes and configure or customize systems to give our clients the ability to publish or find information that is relevant to a specific case, matter, contract, record or piece of IP. Our tools and expert strategies ensure legal excellence, diligent spend management, reporting, and successful integration of the Legal Department into the rest of the organization. Paragon equips clients with the ability to easily locate information within a strong security model, which helps them monitor important cases and matters. It also drives collaboration via reporting, analytics, and subscription capabilities. Paragon also provides project management, business process, information rationalization and mapping, as well as change management services to supplement any program, project or execution upon a Legal roadmap.

Unique Solutions to Fit Your Organizational Needs

While our solutions are purpose-built to fit your organizations unique needs and current position, our services include solution design, selection development and implementation for:

- Contract Standardization
- Knowledge Management and Collaboration
- Strategy and Planning
- Program Enablement
- Policies and Procedures
- Information Governance
- Records Management Enterprise Technologies
- eDiscovery Analysis and Remediation Strategy
- Business Process and Workflow Management
- Enterprise Legal Management Roadmap Development and Execution
- Integration to Governance, Risk and Compliance (GRC)
